

Booking System for Microsoft Office 365 and Microsoft Outlook Online

Today, every company has shared facilities and equipment. Resource sharing within the organization should be simple, quick and intuitive.

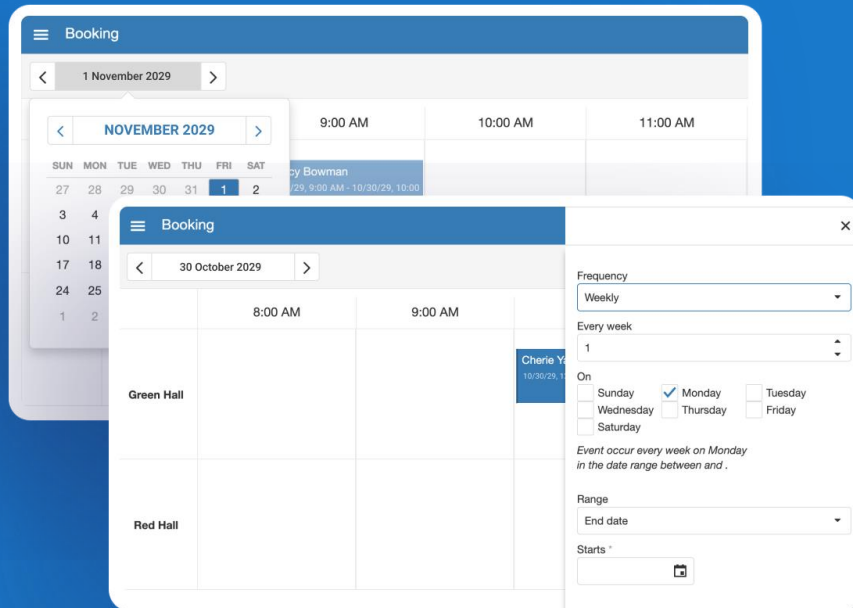

How would you check an occupancy schedule for one of your rooms, auditoriums or tennis courts? Commonly used Office 365 is useless in this situation - just try opening O365 equipment's calendar in any of it's applications, like Outlook, to see for yourself.

If you are an administrator, secretary or facility manager, you always have to keep a huge amount of information close and easily accessible.

Start using cloud based booking system now! No registration required. Free for first 60 days.

Even if you stop using the cloud based booking system, your data will remain intact. Your staff may continue to manage bookings using personal calendars in Outlook.

Your responsible employee should have a convenient, easy-to-use interface to be able to manage shared resources effectively. Checking the schedule or correcting a reservation shouldn't feel like a puzzle.

Schedules are available right on the main page. No extra forms to fill. No extra clicks to do.

The visibility is the main bargaining chip of this Office 365 integrated cloud based booking system.

Cloud based booking system can be configured and adjusted based on your company's needs. This includes changes in the reservation forms, configurable fields and booking algorithms.
